

MULTIFAMILY BUILDING OWNERS:

Grants 2 Go Green

Apply for Funding To Electrify Your building

Find out if you're eligible for grant funding of up to \$25K per unit

WHY SHOULD I APPLY?

New York is greening its electrical grid, and multifamily owners can tap the clean energy and savings by replacing outdated and fossil fuel-burning systems with high-efficiency heating and cooling systems.

The Climate Friendly Homes Fund offers grant funding and technical assistance to help you get ahead of climate mandates and avoid fines.

WHAT CAN I USE MY GRANT FOR?

Replacing an HVAC system with a high-efficiency heat pump (required)

Replacing a domestic hot water system with a high-efficiency heat pump (required where feasible)

Implementing energy conservation measures to optimize new system performance

IS MY BUILDING ELIGIBLE?

Building must be in New York State and:

1. Have between 5 and 50 residential units
2. Must have a current regulatory agreement with a state or city housing agency to provide affordable housing OR be located in one of the following:
 - Low-Moderate Income Qualified Census Tract as defined by the U.S. Department of Housing and Urban Development;
 - NYSEDA Disadvantaged Communities
